Conversion	36%

PRIMARY KEYWORD

weather radar

You told us to target "weather", but we recommend weather radar instead. Your keyword 'weather' is too broad for effective targeting. Every keyword check in this report is scored against weather radar. Other strong options: local weather, hyperlocal weather, doppler radar.

FIX THESE FIRST

4 changes, ranked by impact

Ordered by how much each check can lift your score. Each fix is written for this exact listing.

#1 · 5 pt

SEARCH & KEYWORDS

Primary keyword appears in the title

"weather radar" doesn't appear in the title. This is the single highest-leverage edit available.

RECOMMENDED FIX

Keep your brand name "Thick Moose Weather" at the start of the title and add the keyword right after it, staying within the 30-character limit. For example: "Thick Moose Weather: Weather".

#2 · 2 pt

CONVERSION

Description length is substantial

Description is 655 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

RECOMMENDED FIX

Expand the full description significantly to reach at least 3,000 characters, providing more keyword-rich content for Google Play's indexing. Elaborate on existing features, add more use cases, and include details about the technology behind the hyper-local microclimate intelligence.

#3 · 2 pt

CONVERSION

Description is scannable

The description reads as a wall of text. Chunk it into labelled sections with bullets.

RECOMMENDED FIX

Break up the full description into scannable sections using clear headings and bullet points. For example, introduce 'Key Features' with a bold heading and ensure each feature is a distinct bullet point, making it easier for users to digest.

#4 · 2 pt

CONVERSION

Copy leads with benefits, not features

Only 1 benefit phrase detected. Users convert on outcomes ("save time", "stay organized"), not feature lists.

RECOMMENDED FIX

Integrate more benefit-oriented language throughout the description, especially in the introductory paragraphs. Instead of just listing 'High-Resolution Doppler Radar', explain the benefit: 'Stay ahead of storms and plan your day with confidence using our high-resolution Doppler radar'.

FULL BREAKDOWN

Every check, scored

All 16 checks the engine ran, grouped by category.

Search & Keywords

18 / 26 · 69%

Title uses the 30-character budget

4 / 5

Title is only 19 of 30 chars. That leaves 11 characters of the strongest indexed field unused, room for a keyword descriptor.

Primary keyword appears in the title

0 / 5

"weather radar" doesn't appear in the title. This is the single highest-leverage edit available.

Title reads clean, not a keyword list

2 / 2

Title reads as a brand plus a short descriptor, not a comma-separated keyword list.

Short description uses the 80-character budget

4 / 4

Short description is 63 of 80 chars, the budget is well used.

Primary keyword appears in the short description

4 / 4

"weather radar" is in the short description, Play indexes this field.

Primary keyword lands in the opening words

2 / 2

"weather radar" appears in the opening sentence.

Primary keyword coverage in the description

2 / 4

"weather radar" appears 1×, the safe, useful zone for this length is roughly 2–4 mentions.

Policy Compliance

12 / 12 · 100%

Title follows Play's format policy

3 / 3

Title is free of emoji, ALL CAPS, and repeated special characters.

No banned promo language in title or short description

4 / 4

No banned promotional or ranking language in the title or short description.

Description avoids promotional claims

2 / 2

Description avoids ranking and price-promotion claims.

✓ **Keyword density stays in the healthy range** 3 / 3

"radar" appears 3× (3.6% density), inside the healthy 2–5% range.

Conversion

4 / 11 · 36%

✓ **Short description sells, not welcomes** 1 / 2

Short description is substantive; an action-verb opener would be stronger.

! **Description length is substantial** 1 / 3

Description is 655 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

! **Description is scannable** 1 / 3

The description reads as a wall of text. Chunk it into labelled sections with bullets.

! **Copy leads with benefits, not features** 0 / 2

Only 1 benefit phrase detected. Users convert on outcomes ("save time", "stay organized"), not feature lists.

✓ **Tone stays credible** 1 / 1

Emoji and exclamation marks are restrained, the copy reads professional.

STRATEGIC ADVISORIES

Beyond the copy

Off-listing levers the score cannot measure directly, but that compound over time.

RANKING

Drive review velocity, not just count

Fresh reviews count for more than old ones. Trigger an in-app rating prompt after a positive moment (e.g. completing a task), not on launch.

CONVERSION

Track conversion rate from search

In your Google Play Console dashboard, click the Grow users tab in the left sidebar, then open Store presence and click your default store listing to see your store listing conversion rate (visitor to install). Aim for 25% or higher. If you are below that, the icon, screenshots, or title are losing visitors.

CONVERSION

A/B test screenshots and copy with store-native tools

Play Console's store listing experiments run real-traffic A/B tests at no cost. Test the first three screenshots and the short description first.

EXPANSION

Localize the listing for your top 3 markets

Each locale is a separate listing on Play. An English-only listing under-ranks against localized competitors.

MAINTENANCE

Ship a small update every 6 to 8 weeks

Both stores favour actively maintained apps, and users check the last-updated date. A version bump with a refreshed What's New note is enough.

OPTIMIZED DESCRIPTION

We also optimize your description for you

This report is your ASO score. Log in to the Testers Community website, open your app, and go to the Reports tab to generate an optimized store description, ready to paste into Play Console.
